## EXPERIENCE

---

### Infosys Ltd.

10-01-2022

#### Specialist Programmer

- I have been working for an insurance client from past 2 years in the investment sector, I have developed several python scripts for automation, ETL purposes as well as report creation.
- I have also improved upon the existing python and sql scripts to optimize execution time.
- I created informatica, SSIS as well as sql parser using python that parse the exported xml, dtsx and sql file and provide meaningful insights.
- I have done analysis on investment data, modified the code and represent it to business as per the requirement.
- In this project, I have also worked on multiple ETL technologies and scripts such as SAS, informatica, Markit Enterprise Data Management Software.
